

NEW FAKE TAN – NO MORE TANDOORI TAN

The newest, most advanced fake tan system is now available at The Skin Institute. **Xen-Tan** was created when Dera Enochson, a long time makeup artist, decided she had enough of sunless tan products that looked unnatural on her pale skin. 8 years of research and development have gone into the creation of **Xen-Tan**, building a designer line of sunless tan. From moisturizers to quick-drying mist, each product is formulated to work on face and body and give a natural result.

Which do you think gives a more natural tan?

More olive-undertone | Delicious Scents | Award-winning formulas

Innovative ingredients, such as odour erasers and a time-release complex, give **Xen-Tan** an edge over the competition. Our advanced products feel and smell like luxury body lotions with none of the chemical smell so many people associate with self-tan. For the first time, the level of detail and quality has been given to self-tan that we've come to expect with the top skin care and perfume lines. The difference is:

- Paraben Free
- Encapsulated DHA – smell not as intense
- More olive than 'Tandoori Tan'
- Designed not to cluster

Thank you for all your support over this year.

We will be closed from 1pm Friday the 23rd December and reopen Monday 9th January.

Happy holidays to you all.
Keith, Michelle, Pauline, Colette,
Eva, Georgia, Tracie and Diane

‘Secret Rejuvenation Beneath the Skin’

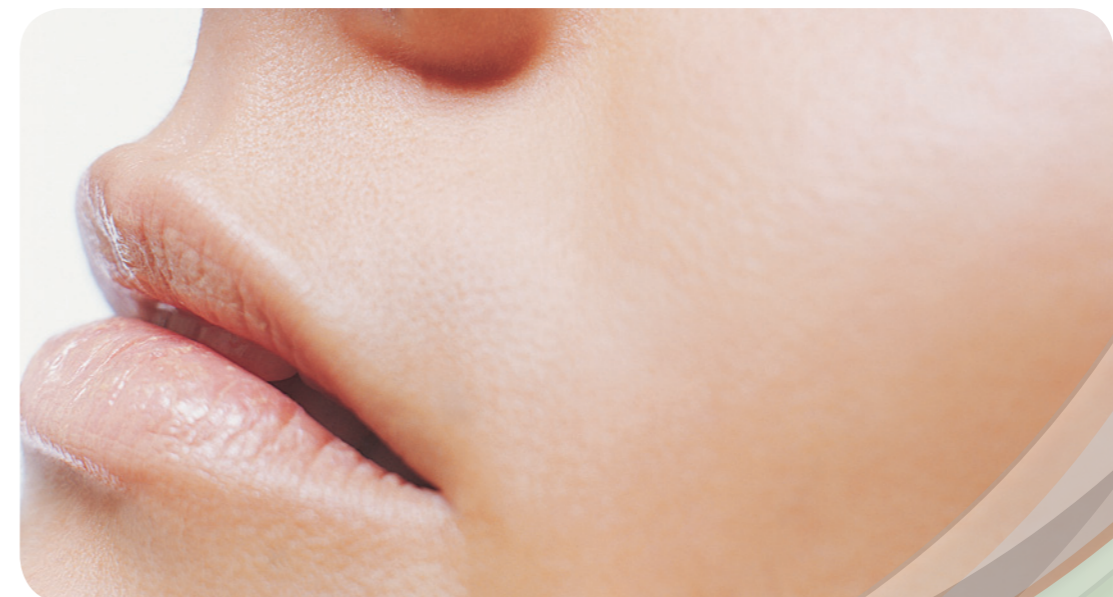

Restylane Asia Pacific Aesthetic Masterclass

Michelle had the fortunate experience of being invited to the Master Injectors Class in Hong Kong in October. The key concern of women regarding ageing is their skin quality. The reason for this is that the state of hydration of the dermis diminishes with age and hormonal changes resulting in a lack of elasticity, dryness and wrinkling. Injecting the skin immediately supports and hydrates

the skin (and of course lifts).

Studies have shown that the injections of Hyaluronic Acids (Restylane™) help rejuvenate the skin. They restore the skins hydrobalance (water balance) and improve skin elasticity and structure (Kerscher M Dermatol Surg 2008) as well as the skin's firmness. The product acts like a reservoir of long lasting hydration leaving the skin smooth and soft with a beautiful lustre and glow.

So now you achieve so much more with fillers.

Teen Aspect

A simple, uncomplicated skin care range designed with the busy teenager in mind.

Teen Aspect is suitable for pre-teens and teenagers who want a quick and easy-to-use skin care regime. Free of the typical nasties, it will not irritate, dry out or clog the skin.

Teen Aspect Cleanser – Step 1

Teen Aspect Toner – Step 2

Teen Aspect Facial Lotion – Step 4

Teen Aspect Stop Spot Travel Stick – as needed

NEW PROCEDURE: iGUIDE – IMPROVED NECKLIFT WITHOUT SURGICAL SCARS

Surgical necklift still gives outstanding results however the downtime and surgical scars can be an issue for some potential patients. Liposuction alone is excellent in the young who have a fatty neck but with great skin tone.

What has been missing is a minimally invasive procedure with short recovery time, minimal to no scarring and can be performed under local anaesthesia for people who fall between these two groups.

Mr Keith Mutimer has been trialling the iGuide system, developed by Hollywood surgeon Dr Greg Mueller, and is now offering this to his patients, who have the correct indications.

iGuide is a technique which provides an improved neck and jawline with minimal incisions, while reducing side effects such as swelling, bruising and the risk of nerve and muscle damage and decreases recovery time. A weaving suture trampoline is combined with liposculpture to

provide support, elevate the skin, muscle and soft tissue as one unit.

Please ask The Skin Institute staff or call Mr Mutimer's office for further information.

WE ARE PROUD TO INTRODUCE
The Skin Institute Essential serums

A Evens out skin tone and texture, reduces open pores, refines skin, lightens, builds collagen

B powerful antioxidant, skin brightener, boosts all of your skin care, protects cell DNA, and

C antioxidant, skin brightener, reduces redness, builds collagen

Buy all 3 for \$250 – that's a saving of \$80

New Ultrasonic white hair remover

Laser is unable to permanently remove light to white hair. We have been in search of technology that will provide this service and we are happy to let you know we are now able to help you with those stubborn white chin hairs, upper lip and other facial hairs.

Our new machine is the industry's first clinically proven ultrasound based hair removal system. This is the next generation of long term hair removal devices.

- Long term hair removal
- Clinically proven results
- Treatment of blond and white hair
- Safe without any side effects
- Pain free treatment
- Applicable for sensitive body areas (eyebrows, upper lip, ears, nose, bikini line and armpit).

DID YOU KNOW THAT...

While the benefits of Vitamin C are well documented, including improving the appearance of lines and wrinkles and assisting with the management of hyperpigmentation, when used in combination with Vitamin E, both give greater photo-protection than when used alone.

Research shows that together Vitamin C and E provide greater antioxidant benefits, photo-protection, as well as greater protection against sun burn.
